akshatpatel555.github.io • github.com/akshatpatel555 • linkedin.com/in/akshat-patel-b4a998185

Computer Science graduate (Cum Laude, Business Analytics minor, Oregon State University) with 4 years of hands-on experience designing and building data pipelines and backend systems using Python, SQL, Spark, and REST APIs. Skilled in distributed computing, data modeling, and database design, integrating multiple data sources into automated workflows, with working knowledge of AWS and Docker for cloud-based deployment. Experience building AI-driven applications by integrating LLMs (OpenAI API) into production systems, plus BI/reporting exposure through Power BI and Tableau. Strong foundation in Agile development, Git-based workflows, and translating business requirements into technical specifications.

EDUCATION

Oregon State University — Corvallis, OR

09/2022 – 06/2026

B.S. in Computer Science, Minor in Business Analytics | GPA: 3.5/4.0 | Cum Laude | Dean's List

Relevant Coursework: Data Structures & Algorithms, Analysis of Algorithms, Operating Systems, Parallel Programming, Software Engineering I & II, Database Systems, Computer Networks, Network Security

PROFESSIONAL EXPERIENCE

Data Engineer — NovaTech USA, Hillsboro, OR

01/2025 – Present

Step Functions, Glue, Lambda, S3, Redshift, CloudWatch, Python (statsmodels/Prophet), Tableau

- Increased forecasting accuracy for inventory planning and production scheduling by building demand-prediction models using exponential smoothing and time-series techniques.
- Eliminated manual data pulls and delivered actionable insights to inventory leads by architecting an end-to-end AWS pipeline that automated recurring inventory reporting.
- Enabled business stakeholders to act on complex data by developing visualization solutions in Tableau that translated it into actionable insights.

Data Analyst Intern — Extendrum Technologies, Portland, OR

06/2024 – 12/2024

Power BI, MS Power Apps, Power Automate, OpenAI API

- Developed interactive Power BI dashboards and KPI scorecards visualizing operational performance to enable data-driven decision-making for clients.
- Integrated OpenAI API into production PlatShift platform and built AI-powered workflow automation with MS Power Apps and Power Automate for client-specific business needs.
- Led client and development meetings to translate business requirements into technical specifications, improving delivery efficiency across projects.

Database and Analytics — Prime Natural, Portland, OR

01/2024 – 06/2024

- Built analytical dashboards tracking product performance, sales trends, and customer engagement to support decision-making and improve e-commerce visibility.
- Developed and maintained customer and product databases to improve data accuracy; partnered directly with the business owner to turn raw data into actionable stock-planning and marketing insights.

Level 2 Lab Technician — Intel — Ronler Acres, Hillsboro, OR

06/2023 – 01/2024

- Led process-improvement projects adopted into the standard lab-testing workflow; partnered with senior engineers on testing-automation scripts that increased testing accuracy and reduced manual error.
- Diagnosed and resolved software and hardware faults in test setups, improving system reliability while maintaining rigorous cleanroom/FAB protocols.

PROJECTS

AI-Powered Cross-Platform Fitness Tracker — Senior Capstone

Flutter, Dart, Python, FastAPI, MongoDB, OpenAI API, JWT, PyOTP

- Led backend architecture for a cross-platform (iOS/Android) fitness app that builds, tracks, and recommends personalized workouts — a FastAPI REST API backed by MongoDB with AI-driven workout generation via the OpenAI API.
- Engineered multi-factor authentication combining JWT access tokens, PyOTP verification, and QR-code session pairing for secure mobile login.
- Delivered features on a 5-person Agile team across two semesters using Git/GitHub, sprint planning, and code review.

Stitching Client Manager — Independent Full-Stack Mobile App

Flutter, Dart, Drift ORM, SQLite, Provider, Scribble, Speech-to-Text

- Built a tablet-first Flutter app end-to-end, replacing a paper-based order-tracking system for a custom tailoring business with a digital client- and order-management platform.
- Architected a normalized, local-first data model (customers, orders, measurements, handwriting capture) on Drift over SQLite with reactive live-updating queries; shipped and maintain v1.3 in daily production use, with unit tests covering balance-due, overdue, and payment-status logic.

TECHNICAL SKILLS

Big Data System: AWS, Apache Spark, Apache Kafka, Amazon S3, AWS Kinesis

Database: MongoDB, DynamoDB, SQL, MySQL, AWS Redshift, RDBMS, Teradata

Programming & Scripting: Python, PySpark, Bash, JavaScript, Dart, C/C++, SQL, HTML, CSS

Visualization: Power BI, Tableau, MS Power Platform, Excel Modeling, Data Modeling, DBMS, Business Analysis

AI & Dev Tools: OpenAI API, LLM Integration, Claude Code, Cursor AI, Windsurf

CI/CD Tools: Jenkins, Git/GitHub

Project Methods: Agile, Scrum, SDLC, Continuous Integration (CI), Test Driven Development (TDD), Unit Testing, Functional Testing

CERTIFICATES

Generative AI Mastermind — OutSkill • Theoretical Computer Science — Oregon State University CoE
