Software Engineer and Computer Science graduate (Cum Laude) with experience building production software, AI-enabled applications, REST APIs, data systems, and automation using Python, C/C++, TypeScript, SQL, and AWS. Experienced in designing and integrating software across complex workflows, translating ambiguous requirements into reliable technical solutions, and collaborating directly with technical and non-technical stakeholders. Hands-on experience with LLM integration, AI-driven application development, data processing, distributed/cloud infrastructure, and full-stack systems. Particularly interested in applying GenAI, agentic systems, and large-scale software engineering to solve real-world problems.

EDUCATION

Oregon State University — Corvallis, OR **09/2022 – 06/2026**
B.S. in Computer Science, Minor in Business Analytics | GPA: 3.51/4.0 | Cum Laude | Dean's List
Relevant Coursework: Data Structures & Algorithms, Analysis of Algorithms, Operating Systems, Parallel Programming, Software Engineering I & II, Database Systems, Computer Networks, Network Security, Software Development

PROFESSIONAL EXPERIENCE

Software Engineer — NovaTech USA, Hillsboro, OR **01/2025 – Present**
Python, C/C++, APIs, SQL, AWS, Data Integration, LLM, Analytics, Automation
- **Improved production efficiency by more than 30%** by designing **LLM-Powered RAG based full stack solutions** that connected sales, inventory, and production data to solve operational planning and decision-making challenges.
- **Designed and automated data integration workflows** using C/C++ backend & microservices, Python, React/TypeScript, and Git CI/CD, eliminating recurring manual data extraction and improving reliability and availability of operational data; deployed using **AWS CloudFormation (IaC)**
- **Accelerated delivery of custom technical solutions** by partnering directly with technical and non-technical stakeholders to understand operational challenges, translate requirements into **APIs and application capabilities**, and iteratively validate solutions against real-world workflows.

Software Engineer Intern (Full Stack)— Extendrum Technologies, Portland, OR **06/2024 – 12/2024**
GenAI, LLM Integration, Open AI, API Integration, Workflow Automation, TypeScript, MS PowerPlatform, Git, Docker, Power BI
- **Modernized SaaS application (PlatShift)** by integrating the **OpenAI API and GenAI capabilities** with C services and React/TypeScript interfaces, delivering AI-powered workflow automation for real business use cases.
- **Improved delivery of client-facing technical solutions** by collaborating with clients and engineers to translate business requirements into scalable technical specifications, iterating on application designs and communicating implementation decisions across stakeholders.

Database and Analytics — Prime Natural, Portland, OR **01/2024 – 06/2024**
Git, Docker, Data Processing, Data Integrations, Data Modeling, SQL, Git, Analytics
- Improved visibility into product performance, sales trends, and customer engagement by developing **SQL-backed analytical dashboards** and structured data models that transformed raw business data into actionable inventory and marketing insights.
- Improved accuracy and maintainability of customer and product data by developing and maintaining relational databases, applying data-quality and validation practices (Git), and partnering with the business owner to translate reporting requirements into reliable data solutions.

Hardware / Software Support Technician— Intel — Ronler Acres, Hillsboro, OR **06/2023 – 01/2024**
QA, Testing, Automation, Cross - Functional Collaboration
- **Improved testing accuracy, system reliability, and engineering workflow efficiency** by developing automation scripts and process improvements for **hardware/software test systems** that were adopted into Intel's standard lab-testing workflow.
- **Accelerated resolution of complex engineering-system failures** by diagnosing **hardware/software integration issues**, performing root-cause troubleshooting with senior engineers, and documenting repeatable testing and resolution practices.

PROJECTS

AI-Powered Cross-Platform Fitness Tracker — Senior Capstone
Python, FAST API, OpenAI, LLM, React, TypeScript, MongoDB, Docker, AWS
- **Built an end-to-end AI-powered application** using FastAPI, MongoDB, React/TypeScript, and OpenAI API to generate personalized workout recommendations from user inputs through LLM-powered workflows.
- **Designed secure, deployable application infrastructure** with JWT/PyOTP multi-factor authentication, Docker containerization, automated testing, and GitHub CI/CD on AWS-compatible infrastructure.

Stitching Client Manager — Independent Full-Stack Mobile App
Flutter/Dart, JavaScript, React, TypeScript, Drift ORM, SQLite, Docker, Git, Unit Testing
- Built a tablet-first full stack application end-to-end, replacing a paper-based order-tracking system for a custom tailoring business with a digital client- and order-management platform focused on excellent user experience.
- Built a normalized, local-first data model on Drift over SQLite; applied Docker for container-related development, Git for version control, and unit tests; shipped and maintained v1.3 in daily production use.

TECHNICAL SKILLS

Data Modeling AI & Dev Tools: RAG, Agentic AI, GenAI, OpenAI API, LLM Integration, Claude Code, Cursor AI, Windsurf |**Languages**: JavaScript, TypeScript, Node.js, C#, Python, PySpark, Bash, Dart, C/C++, SQL, HTML, CSS | **Frontend**: React.js, Angular, Industry-Standard **Frameworks DevOps & Infrastructure**: CI/CD Pipelines (GitLab CI/CD, GitHub CI/CD), Container-Related Development and Deployment (Docker), OpenShift/Kubernetes, AWS ROSA, AWS (S3, Lambda, Glue, Step Functions, Redshift, CloudWatch, CloudFormation, Kinesis), Jenkins | **Version Control**: Git, GitHub, Version Control Systems | **Databases & Big Data**: MongoDB, DynamoDB, SQL, MySQL, AWS Redshift, Databricks, RDBMS, Teradata, Apache Spark, Apache Kafka | **Visualization & BI:** Power BI, Tableau, MS Power Platform, Excel Modeling | **Methodologies**: Agile, Scrum, SDLC, Continuous Integration (CI), Test Driven Development (TDD), Unit Testing, Functional Testing

CERTIFICATES

Generative AI Mastermind — OutSkill • Theoretical Computer Science — Oregon State University CoE
